MULTI CYLINDER DRYING RANGE MACHINE

Multi Cylinder Drying range consists of an Indirect drying system. Vertically stacked Stainless steel cylinders suitable for batch to batch drying as well as continuous processing for all types of fabrics demanding intermediate or final drying.

The structure consists of Sturdy and self-supported stainless steel/ Mild Steel walls providing a free and modular design which makes it easier to install, operate & maintain.

The Driving force consists of synchronised motor Gearbox attached to the cylinders (individually or alternate) as per the fabric quality. High-quality bearing and Pedestal provides smoother rotation of the cylinders.

SALIENT FEATURES

- Creaseless Drying of Fabric along the width
- Efficient Steam consumption
- Temperature controller System
- Teflon Coating (Optional)
- Moisture Control System
- Steam Exhaust Hood (Optional) : Avoids water percolation.
- Single Sheet cutting and Bending to Provide seamless and maximum Linearity.
- Number of Cylinders per Stack : 6 to 12 Max.

SPECIFICATIONS

Roller Face Width	:	1525mm to 3400mm
Diameter of Cylinder	:	800 mm
Working Steam Pressure	:	3 to 3.5 kg/cm ²
Cylinder Made Out from AISI 304 Quality
